

POLY(ARYLENE ETHER)-CONTAINING THERMOSET COMPOSITION IN  
POWDER FORM, METHOD FOR THE PREPARATION THEREOF, AND  
ARTICLES DERIVED THEREFROM

ABSTRACT OF THE DISCLOSURE

[0074] A curable resin composition including a poly(arylene ether), an allylic monomer, and an acryloyl monomer may be formulated as a powder. The resin composition exhibits improved toughness, and it is useful in thermoset processing applications where use of powdered resins is preferred.
